Certificate of RoHS Compliance

To Whom It May Concern:

Thank you for your recent inquiry regarding Oak-Mitsui Copper Foils and their compliance with the European Parliament's Restriction on Hazardous Substances (RoHS) and the Waste Electrical and Electronic Equipment (WEEE) Directive. Oak-Mitsui hereby certifies that its copper foil complies with both the RoHS and the WEEE Directives and does not exceed the maximum concentration values for cadmium, lead, hexavalent chromium, mercury, polybrominated biphenyl (PBB) and Polybrominated diphenyl ether (PBDE).

Oak-Mitsui employed the services of an independent laboratory to obtain certified material analysis, which confirmed the results of Oak-Mitsui's internal testing. Products tested were confirmed to be compliant with the RoHS Directive.

In addition to the above stated materials, Oak-Mitsui Copper Foils are either not manufactured with or do not contain the substances listed in Attachment 1 at detectable limits.

Should you have any additional questions or need assistance, please contact me via email at diana.porter@oakmitsui.com or via telephone at 803.425.7904.

Respectfully,

C. Diana Porter

Oak-Mitsui, Incorporated

Health, Safety, & Environmental Leader

**Certificate of RoHS Compliance****Attachment 1**

- Asbestos, asbestos compounds
- Chlorofluorocarbons & halons
- Diethylene glycol dimethyl ether
- Diethylene glycol monomethyl ether
- Ethylene Glycol Monoethyl Ether (& its acetate)
- Polybrominated biphenyls, biphenyl ethers/oxides
- Polychlorobiphenyls and derivatives (PCBs)
- Polychloroterphenyls and derivatives (PCTs)
- Halogenated dioxins and furans
- Azo Dyes
- Pb in cable jackets
- Aluminum and aluminum compounds
- Amines, aliphatic
- Aniline salts
- Anthracene
- Antimony and antimony compounds
- Aromatic amines and dyes
- Aromatic compounds as monomers
- 4-Aminobiphenyl
- Barium compounds, except barium sulfate
- Beryllium and beryllium compounds
- Bismuth and bismuth compounds
- Chloroparaffin
- Cobalt and cobalt compounds
- Ferrosilicon and alloys
- Gold and compounds
- Halogenated aromatic compounds as monomers
- Halogenates that produce acidic vapor with water
- Iron and iron compounds
- Magnesium and magnesium compounds
- Organic azo and azo-oxy compounds
- Organic halogen compounds
- Organic phosphorous compounds
- Organic silicon compounds
- Palladium and palladium compounds
- Perfluoro alkyl sulfonates (PFAS) and derivatives
- Perfluorocarbons
- Phthalates
- PVC and vinyl chloride monomer
- PolyBrominated Terphenyls

- Selenium and selenium compounds
- Silver and silver compounds
- Small Fibers - Products w/fibers \leq 5 microns diameter
- Tantalum and tantalum compounds
- Tellurium and tellurium compounds
- Tetrabromobisphenol-A
- Tetramethylthiuram disulfide (Thiram)
- Thallium and thallium compounds
- Tin and organo-tin compounds
